SUMMARY

I'm Afshin Asghari with over 8 years of professional experience in backend development with a focus on REST API and Database Design.

Proficient in building and developing applications using PHP and the Laravel Framework.

Key Skills:

- Adept at staying current with emerging technologies and workflows.
- Skilled in adhering to structured programming and design patterns.

Work Approach:

- Flexible in adapting to both team-oriented and independent development projects.
- Disciplined and dedicated professional with a strong commitment to quality and efficiency.

EXPERIENCE

04/2024 - Present

Senior Back End Developer

The Dexion Studio

- Implementation of scalable RESTful APIs using Laravel for high-traffic client applications.
- Architected domain-driven design (DDD) models for complex database schemas in MySQL/PostgreSQL, improving data integrity and enabling seamless integration with frontend teams on custom web platforms.
- Migrated legacy systems to AWS serverless architecture (e.g., Lambda and API Gateway), reducing operational costs by 25% and enhancing deployment efficiency with Docker containers.
- Collaborated with design teams to integrate real-time features via WebSockets in Laravel, enhancing user engagement on interactive digital experiences for key clients.

05/2022 - 03/2025

Back End Developer [Part-time]

Oand1

- Developed RESTful APIs using Laravel and PHP for educational platforms, enabling features like real-time attendance monitoring and automated online exams for students, supporting seamless data integration across user groups.
- Gained hands-on experience with AWS deployment, configuring EC2 instances and S3 storage to host scalable backend services.
- Designed and optimized database schemas for student management systems, incorporating attendance tracking and test result analytics, which enhanced data accuracy.
- Implemented secure authentication and API endpoints for educational tools, ensuring compliance with data privacy standards while facilitating features like student progress reporting and automated grading.
- Collaborated with cross-functional teams to deploy serverless components on AWS Lambda, accelerating feature rollouts for online testing modules.

08/2020 - 04/2024

Back End Developer

The Dexion Studio

- Developed and maintained robust PHP-based backend systems with Laravel, handling database design for multiple client projects and ensuring compliance with REST API

standards.

- Optimized database queries and indexing strategies, boosting application performance by 35% and reducing load times for data-intensive features like user analytics dashboards.
- Implemented Git version control workflows and conducted code reviews, fostering team collaboration and maintaining high code quality across 10+ projects.
- Wrote comprehensive unit and feature tests, achieving 80% code coverage and minimizing downtime in production environments.

07/2019 - 09/2020

Back End Developer

Freelance

08/2018 - 07/2019

Back End Developer

Sarir Pars Tech

EDUCATION

2021

Computer Engineering
